**XXIVth CONFERENCE OF THE DANUBIAN COUNTRIES ON THE HYDROLOGICAL  
FORECASTING AND HYDROLOGICAL BASES OF WATER MANAGEMENT**

**Organised jointly by:**

Slovenian National Committee for the IHP UNESCO

International Association of Hydrological Sciences

Environmental Agency of the Republic of Slovenia

## CONFERENCE TOPICS

### **1. Hydrological forecasting**

- Real-time informational forecasting systems
- Models for rainfall-runoff processes
- Other hydrological forecast models

### **2. Hydro-meteorological extremes, floods and droughts**

- Meteorological data and hydrological modeling
- Long-term statistical methods
- Examples of extreme flood and drought events

### **3. Global climate change and hydrological processes**

- Climate change impact on the hydrological cycle
- Hydrological balance model
- Ecological aspects of hydrological changes
- Adaptation strategies in water management

### **4. Water management**

- Consequences of the EU Water Framework Directive and the EU flood directive
- Water framework directive and integrated water quality processes
- Exchange of hydrological products, methods and models
- Legal and administrative challenges for integrated water management

### **5. Floods, morphological processes, erosion, sediment transport and sedimentation**

- Monitoring of watershed and river bed/reservoir erosion and sedimentation
- Models of erosion and sediment transport
- Flood directive and integrated flood management

### **6. Developments in hydrology**

- Prediction in ungauged basins PUB
- Lessons learned from experimental river basins
- Examples from FRIEND, HELP, European Research Basins (ERB)

## CALL FOR PAPERS

Participants intending to present a paper or poster should submit an abstract of 400-500 words in English by E-mail (danube@fgg.uni-lj.si) by **16 November 2007**. Authors will be notified of acceptance by **15 January 2008** and full papers should be submitted by **31 March 2008**. After review, the papers will be pre-published in the conference proceedings.
